Who we are

Anew Home Health Agency has been serving Indiana and surrounding counties as a nurse owned and operated agency since 2001.

Our mission is to provide our patients with high-quality outpatient programs in their place of residence. Hand-in-hand with physicians, we will limit the need for hospitalization.

Nursing

Our nurses observe and assess the health of their patients and develop a plan of treatment with the assistance of the primary care physician. They monitor vitals, reactions to medications, and look for changes in behavior to ensure a safe home environment for the patient.

Certified Nurse Aide

Our certified nurse aides help assist with daily living activities that patients might have trouble doing on their own, such as bathing. We pride ourselves that our aides are compassionate and understanding of patient needs.

Therapy

Therapy in the home environment helps people across the lifespan to participate in activities and tasks that they want to do. We focus on adapting the environment to fit the patient in order to maximize independence, safety, strength, and endurance so the patient is able to live life to the fullest while being in the comfort of their home.

Mental Health Nurse

Our mental health nurse works closely with all physicians & specialists to provide services such as follow-up after in-patient treatment; coping skills; relaxation techniques; medication instruction, assessment, & management; referral(s) to community services.

Still not sure if you would benefit from Home Health Care?

AnewNursing.com
or contact our office to learn more.

Speech Therapy

Our speech therapists are certified in the use of Vital Stim Therapy, Interactive Metronome, and the Iowa Oral Performance Instrument. Speech therapy may be needed following an illness or injury such as a stroke, when communication skills become limited, or swallowing becomes difficult.

Medical Social Worker

Patients recovering from illness or trauma may become psychologically, emotionally, and socially destabilized; it is the duty of our medical social worker to provide support for these patients ensuring that the best interests of the patient are being met.

Proudly providing Quality Care to Indiana & surrounding counties since 2001
